**PICTURES, VIDEOS, & ONLINE
BIDDING AVAILABLE**

Dear Cattlemen & Cattlewomen-

I am so excited to invite you to the Power Performance Pedigree Sale. An extraordinary set of consigners have brought you an elite set of performance tested and pedigreed animals. The animals in this sale must qualify for the sale through DNA and EPD's. Power & performance cattle bulls must have 8 and females 7 of the EPDs in the catalog TOP 50% or better, and show animals must be halter broke and able to lead. We feel this will give you the best set of animals available for purchase, and give you every bit of available information in your decision making progress.

Whether you plan to attend the sale in person, bid via phone or Internet, we are here for you! We have 4 experienced and knowledgeable sale representatives that are here to help. These individuals can evaluate lots or handle bids for you. Rest assured proxy bids, phone bids, and Internet bids are handled in a secure and confidential matter.

The set of bulls and females in this sale are some of the best animals available with many of them having EPDs that are TOP 1%. Many of our consigners have noted, they wanted to bring you something really special and that it is hard to want to part with such an excellent animal. There are many sale attractions throughout the catalog. Whatever we can do to help you please let us know. We want you, your family, and farm to be successful and safe.

Saturday October 14th, 2023 will be a great day for Angus in Midwest, so mark your calendar and be sure to join us!

Thank you-

Phoebe Wiles
Sale Manager
417-293-8002

JUNIORS & 4H/FFA YOUTH

There will be a drawing before the sale for multiple \$100 junior discounts to be used on the purchase of any female during the sale. The raffle is limited to one use per junior per year.

All buyers invited to view the sale animals morning of sale day.

Rules for the Fall 2023 Sale

This is The Power Performance Pedigree Sale held in Mountain Grove, MO. Commercial and purebred buyers will have individual performance data available, along with pedigree, to select prospective bulls and females.

- A. The bulls eligible for the sale must be no older than 30 months at sale date.
- B. The females eligible for the sale must be no older than 7 years at sale date.
- C. All bulls nominated must be weighed at weaning (between 160 and 280 days of age.)
- D. The bull's yearling weight must be taken (320 to 440 days). He must have a 365 day weight of 950 pounds or better.
- E. Performance Bulls must rank in the 50th percentile or better for 8 of the following EPD traits: CED, BW, WW, YW, RADG, SC, HP, CEM, Milk, Doc, CW, Marb, RE, Fat, \$M, \$W, \$B, and \$C for non-parent bulls in the most recent sire evaluation.
- F. Performance Females must rank in the 50th percentile or better for 7 of the following EPD traits: CED, BW, WW, YW, RADG, SC, HP, CEM, Milk, Doc, CW, Marb, RE, Fat, \$M, \$W, \$B, and \$C for non-parent cows or current dams based on age. "A" lots may qualify through their dam.
- G. Show cattle may qualify as long as they are halter broke and able to lead.
- H. All lots over 7 months of age should have DNA & a genomic profile applied for.
- I. Age of dam adjustments will follow the breed associations guidelines.
- J. All bulls must be semen tested and examined for breeding soundness by a veterinarian within 60 days of sale, using standard assay analysis of semen approved by the College of Veterinary Medicine, University of Missouri.
- K. Scrotal circumference as taken by the producer's veterinarian during the breeding soundness exam will be reported sale day. Minimum circumference 33cm.
- L. All animals will be at the sale location by 6:00 p.m. day prior to the sale.
- M. Information not available at press time will be available sale day on supplemental sheets.
- N. All cows that sell as bred and safe in calf must have a pregnancy examination within 30 days of sale and stated stage on health papers.
- O. Consignors shall furnish an official health certificate issued within 30 days of sale date. All calves old enough to be split from dams will need a separate health paper.
- P. Shipping & Handling Cost of Embryos and Semen is the buyers expense.

TERMS AND CONDITIONS

TIME: Sale begins at 1:00 p.m. October 14, 2023.

BIDDING: A floor price will be \$2000 on bulls.

TERMS: The terms of the sale are cash. Bring your personal or local bank check.

DISPUTES: The auctioneer will settle any and all disputes as to bids by declaring all bids off and reselling the animal in question.

HANDLING: Each animal will be purchaser's risk as soon as sold, but will be cared for by the owner for a reasonable period until they are loaded, free of charge to the purchaser but at his risk of loss or injury. All animals are sold and will be paid prior to loading.

CERTIFICATES: A certificate of registry and transfer will be furnished for each animal sold by respective breeder.

BREEDING GUARANTEE: All animals of breeding age (15 months or older) at time of sale are guaranteed breeders. Animals are guaranteed breeders if properly cared for and not used within the herd until 15 months of age. Any bull which settles at least one third of the healthy cows he breeds will be considered a breeder. Any animal that has not proven itself a breeder within six months after the sale date, if in healthy condition, and meeting the health regulations of the State of Missouri, may be returned to the farm of the seller, at the buyer's expense. The seller reserves the privilege of trying for a period of six months, to prove the animal a breeder. Should an animal fail to prove a breeder in the specified time period, the seller will refund the purchase price which shall be considered as full settlement and satisfaction of all claims. All complaints regarding breeding difficulties must be reported in writing by the buyer to the seller within six months.

EMBRYO GUARANTEE: Embryo conception guarantee will be stated for each lot. Embryos are guaranteed if transferred by a licensed embryologist or Whitaker Embryo Transfer. Guarantee for establishment of 60-day pregnancy, failure of pregnancy must be verified by vet. Buyers of embryo packages that fail to establish the pregnancy rate will be given additional embryos from the seller from the same mating, or another of similar value. The transfers must take place within a year of the sale date, and seller must be notified within a reasonable period of time of the failure to produce a pregnancy.

ANNOUNCEMENTS: Announcements from the auction box will take precedence over the printed matter in this catalog.

CONTRACT: The above terms and guarantee shall constitute a contract between the buyer and seller of each animal sold. All animals sell under the standard terms and conditions set forth by the American Angus Association.

SALE ORDER: The lots will sell from the oldest to the youngest, in their respective classes. In cases of identical birth dates, the bull with the greater yearling EPD will sell first. The females will sell from the oldest to the youngest. In cases of identical birth dates, the female with the greater yearling/weaning EPD will sell first.

HEALTH: Bulls have been vaccinated for five strains of Lepto within 60 days of the sale. Health certificates will be furnished. Non-virgin and bulls over 24 months in age will be tested for trich.

LIABILITY: All persons who attend the sale do so at their own risk, the sale committee, The Power Performance Pedigree Sale, Live Wire Auction LLC, and Wright County Livestock Auction assume no liability, legal, or otherwise.

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Percentile Rank - As the percentile moves toward 1, it indicates this animal is top X% of the Angus Breed

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Docility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

More on EPD's

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

Abbreviations

(I*) Interim EPDs - Interim EPDs are EPDS that are calculate as a provisional or temporary EPDs. Interim with pedigree only- in this case only pedigree information is available, sometimes called a pedigree index, and past relatives EPDs are involved in calculating the interim EPD. While admittedly low in accuracy, an interim value gives you a snapshot of the animal's value as a parent, and, thus, it provides a temporary selection-decision tool.

 J520 is out of a hard working 10 year old dam acquired from the Circle A dispersal. The sire of this bull is Connealy Emerald, long known for siring front pasture type cows that thrive on Missouri type pastures. If you need a bull to sire those females that bring in big calves and don't bust the bank while doing it, Va Emerald J520 needs to go home with you. Best suited for cows.

The Ruby Family is one of the great maternal families of the breed. The MGGD Ruby 2372 was selected as the top-selling bred heifer of the 2014 44 Farms Spring Sale and is an outstanding carcass leader in the 44 Farms donor program. The MGD 6218 has been an excellent donor for Seagraves, a maternal sister to this heifer is the Ruby 6218 who is a donor at 44 Farms. 2180 combines the attractive big-hipped, wide base of Home Town with the femininity and maternal traits of the Ruby line. 2180 is an exquisite blend of phenotype and genotype; double digit calving ease, massive growth, feed efficiency, fertility, marbling, and a \$C of +348. She truly does it all!

**SEAGRAVES RUBY 2180
DONOR DAM OF 20A & 20B**

Beal Breakthrough has demonstrated his prepotency for DNA and already sired many of the highest \$C cattle on the sorts, if you want to move almost every EPD and Index closer to \$400 there is greatness to be captured in Breakthrough.

E W A Captain is the \$258,000 valued selection of Butz-Hill and FB Genetics at the 2021 Edgewood Angus sale. Captain is an excellent spread bull with his combination of calving-ease, growth, carcass, \$W, \$B and \$C. Captain stems from a third generation Edgewood Angus donor whose dam, 531, is the \$25,000 cornerstone of the Capitol Angus program. Semen is not available to public and this is an excellent opportunity to gain a daughter of this fantastic bull!

Seagraves is offering a rare and exciting opportunity on a pregnancy out of prolific Ruby line, sired by two of the hottest bulls in the breed, either way it's a home run!

Offering choice of 20A or 20B guaranteed heifer pregnancy due 12/09/23 to either Breakthrough or Captain.

BH Paragon 2021 is the \$50,000 valuation hot new donor at Soaring Eagle. 2021 is sired by the now deceased Ankonian Paragon, she brings one of the most dynamic EPD and genomic profiles to the Angus breed. She is a true spread female hitting all the marks on calving ease, astronomical growth, feed efficiency, and docility.

The carcass profile on this female is a spectacular combination of Carcass Weight, Marbling, and Ribeye. She has both TOP 1 Marbling EPD & Genomic Ranking. Note her \$Values, every value listed in this catalog is TOP 1%.

\$W +89 TOP 1% \$B +241 TOP 1% \$C +380 TOP 1%

ELEVATE is an exciting new sire from Edgewood Angus and combines the pedigrees of TOP CUT x TAHOE X NEW DAY 454, creating an extremely complete out-cross genetic gem!

Genetic outlier for \$M and \$C combination, ELEVATE offers an elite EPD profile that is hard to match. He ranks at the top of the breed for WW, YW, HP, CEM, MILK, MARB and REA, all with a +8 Show-Me-Select Calving Ease. Few sires offer the complete genetic package as ELEVATE.

**BH PARAGON 2021
 DONOR DAM OF 21**

Soaring Eagle dug deep to bring something really special to sale! This front pasture mating is capable of raising future sale attractions and will be an excellent addition to any herd!

 This is a very balanced 2 year old heifer with an excellent udder. She has a great combination of EPDS. She is one of only 5 non-parent cows in the breed with her combination of CED, BW, WW, YW, MILK, DOC and \$C. This is another young herd building cow. Bred 12/01/2022 to K C F Bennett Exponential Reg # 19507801 Sells with bull calf at side born 9/01/23

Powerhouse Jet Black daughter. You will be impressed with her length of body and overall thickness. She is one of only 7 dams in the breed with her combination of CED, WW, YW, RADG, CW and MARB. She has calving ease, tremendous growth, feed efficiency, and carcass traits. She is a maternal sister to the record high selling bull at the tested bull sale at \$12,500. Her cow family has shown amazing productivity. Her dam has 10 natural calves with a 393 day calving interval. In addition, she has 7 embryo calves, and she is doing well at twelve years of age. Her granddam had 13 natural calves with a 381 day calving interval. In addition, she has 9 embryo calves, and produced well to 16 years of age. The projected EPD's of her Fireball calf: CED 12 WW 77 YW 144 CW 78 MARB 1.59 \$C 345. Her calf will be genomic tested prior to sale date. This is a chance to add a herd builder with years of productivity in her. Bred 12/08/2022 to GB FIREBALL 672 Reg # 18690054

A female in her prime that is deep bodied with excellent spring of rib. She produces front pasture progeny. In full disclosure cow had teat that was cut, it healed and she has raised two amazing calves. All male calves have sold as bulls, always sold in top 1/3 of sale. Cow's quality of offspring has kept her in herd. AI to Exponential on 11/20/22 then pasture exposed to AAA 20281278. Gentle cow with only daughter retained.

 Really nice Southern Charm daughter, with an outstanding bull calf at side. Calf is sired by BUBS Alibi 014H (Reg #19694254), which goes back to the great Hickory Hill Erica TA32, who is currently a donor at Herbster Angus. Bull calf born 7/17/23 sired and had an actual BW of 63 pounds. This is an excellent footed female, note her Top 15% Claw and Top 20% Angle. Top 25% WW, and Top 35% \$Grid. Sells bred A.I to 44 Victory (Reg # 20126678 CED +13, WW +93, YW +168, \$B +251 \$C +387) on 9/23/23.

A really nice cow, with proven success! 262C is an amazing genetic transmitter and has created many foundational curve bending number animals for Asher Farms. Her Monumental daughter sold in the Spring 2023 Power Sale for \$6100. Her Guarantee daughter lot 34A is a +308 \$C! Note her double digit calving ease, Top 15% Scrotal, and TOP 15% \$W. She is AI bred to Crawford Guarantee 9137 (Reg # 19526770) and due 11/30/23. Be sure to check out Lot 34A to see the potential in this mating! Here is an excellent chance to get the factory, daughter, and full sib!

BAR Southern Rita is a fleshy black heifer natural bred to GAR Hometown #20241970. Her Dam is FF Rita 5H16 of 2B40 2Q26 from Friendship Farms. This female has an excellent pedigree as she is a direct descendant of the \$260,000 Rita 2V9 of 2536 1407 a major producer of donors in the breed. Her MGS sire is the great WRR "Zeus" who has generated many top producing bulls and females! She has a CED of +13 and boasts a marbling of 1.24. She is "Targeting the Brand" and looks the part! Pasture exposed 01/01/23 - 09/10/23 to GAR Hometown #20241970 for an October 2023 calf.

 STP Forever Lassie 039 is confirmed safe to Poss Deadwood. Vet ultra-sounded, and sexed the calf a HEIFER! Her EPDS reflect the quality of this front pasture cow: CED+8, WW+79, YW+150, and \$C 336. She was AI Bred to Poss Deadwood (Reg # 19597261 CED +9, WW+84, YW +150, Marb +1.94, \$B +264, \$C 403) on 5/23/23 and is due to calve on 3/6/24. Grab a calculator and do a little math on this mating potential \$Values on this HEIFER calf are \$B +248 & \$C +370. She comes from a long line of Forever Lassie females, these females make good productive cows. She is a maternal sister to the Top Selling bull at the SW MO Tested Bull sale Spring 23 that sold for \$5,700. Here is an incredible opportunity to get a game changer calf, out of a proven cow family!

Really nice GROWTH FUND daughter. She is very thick with a nice set of feet and legs. She is a real curve bender heifer. She has a Top 20% CED and BW with a Top 10% WW and YW. Note she also has a Top 10% CW and REA. Her dam has had 4 calves at a 368-day calving. This heifer does it all, she has stacked EPDs and looks really flashy in the field!

MBF Capstone Fireball I41 is the epitome of a power house, she embodies a depth, frame, femininity and stellar numbers. I41 has Show-Me-Select calving ease with TOP 1% YW, RADG, CW, \$F, \$G, \$B, and \$C at 392! She has twenty EPD & \$Values in the TOP 10% or better.

Symmetry 228 made an impact after selling for \$150,000, and very limited semen has been released for public consumption. Huge growth numbers, Top 10% HP, Top 10% Marb, TOP 1% RE, TOP 1% \$B, and TOP 1% \$C. This could be the Clarity son that becomes the real DNA upgrader.

A rare opportunity to purchase embryos from I41 and the now deceased Ankonian Paragon 0C4. Paragon offers one of the breed's most compelling EPD profiles. He will move your herd in the right direction on CED, BW, WW, YW, RADG, DMI, DOC, HP, CEM, CW, Marb, RE, FAT, \$M, \$W, \$F, \$G, \$B and \$C. Paragon is very sound structurally and has the presence and kind that you want in a herd sire.

Teague Erica 8002 is a curve bender! She is deep bodied, with loads of dimension, a solid set of feet and smooth movement. She combines TOP 1% WW, YW, RADGE, MARB, \$B, and \$C. In addition strong SC, HP, and Milk makes this female an excellent blend of high quality EPDs. Combining this female with Ares is an All-Star mating. This combines the Prop Erica and War Calvary lines which are destined to be 2 names that leave a huge impact on the Angus industry. PAR Ares was selected by FB Genetics as the top-selling bull of the fall 2021 sale at Percy Angus Ranch and he has been used extensively in the FB embryo program. Of the Top 50 non-parent females sired by Ares, as of 9/15/23 there has been an average increase of 42 points in \$C from Dam to Heifer, WOW! Do a little math on this mating, it is staggering and sure to set you apart from the rest!
